## WOWBUTTER NON-Genetic Modification Verification

November 9, 2017

To Whom It May Concern:

Please find below a summary of the ingredients used in the production of WOWBUTTER and how we maintain and confirm the NON-GMO status of each ingredient:

**Whole Toasted Soy:** The soybeans used to produce the Toasted Soy in WOWBUTTER are from identity preserved NON-Genetically Modified soybeans grown in Canada and/or the United States and are planted, harvested, transported, stored, conditioned and packaged in such a manner so as to minimize the risk of contamination from other soybean varieties. Our soybean supplier is certified with Identity Preserved Recognition Plus HACCP that ensures identity and NON-Genetically Modified preservation. In addition, all raw soybeans are tested for the presence of Genetic Modification prior to unloading at our facility using the EnviroLogix™ QuickStix™ Kit for Roundup Ready® Bulk Soybeans, which has a sensitivity of 0.1%. Any soybeans that fail the Genetic Modification strip test are rejected.

**Pressed Soy Oil:** The oil used in WOWBUTTER is a fully refined naturally pressed soy oil derived from Soybeans that have NOT been Genetically Modified from USA origin. We retain documentation and confirmation from our oil supplier confirming that the soy oil we purchase is NOT Genetically Modified. The supplier is certified by the Non-GMO Project that ensures identity and NON-Genetically Modified preservation.

**Cane Sugar:** A little cane sugar is added to compliment the natural sugar already found in Soy. The cane sugar used is derived from raw sugar cane sources and suppliers that do not grow Genetically Modified varieties. Documentation from the supplier is kept on file to indicate the NON-Genetic Modification status of the sugar.

**Palm Oil:** A tiny amount of Palm Oil is added to WOWBUTTER to help prevent oil separation. The origin of the palm that is used comes from sources that have NOT been Genetically Modified. Documentation from the supplier is kept on file to indicate the NON-Genetic Modification status of the palm oil. Furthermore, the palm oil is sourced sustainably from a supplier that is part of the Roundtable for Sustainable Palm Oil (RSPO (<http://www.rspo.org/>)).

**Sea Salt:** A pinch of Sea Salt is added. There is no Genetic Modification done on sea salt.

**In Summary:** We are committed to ensuring that all ingredients used in the production of WOWBUTTER are derived from ingredients of NON-GMO origin and that they will continue maintain the NON-GMO status. We further verify the NON-GMO status with 3<sup>rd</sup> party testing completed every 3 months for GMO's at an accredited lab. Test results are available on our website or upon request.

Best Regards,

Scott Mahon
